YOUR POTENTIAL REALIZED

```
update msg model =
  case msg of
    Increment ->
      model + 1

    Decrement ->
      model - 1
```

```
============== WARNINGS ================

-- missing type annotation - /.../elm-counter/src/elm/Main.elm

Top-level value `update` does not have a type annotation.

29| update msg model =
      ^^^^^^

I inferred the type annotation so you can copy it into your code:

update
    : Msg
    -> Model
    -> Model
```

```
update msg model =
  case msg of
    Increment ->
      model + 1

  Decrement ->
    model - 1
```
