REALKINETIC

YOUR POTENTIAL REALIZED

```
const helloWorldReducer = (state=0, action) => {
  switch(action.type){

    case PLUS:
      return Object.assign({}, state, state + 1)

    case MINUS:
      return Object.assign({}, state, state - 1)

    default:
      return state
  }
}
```

```elm
type Msg = Increment | Decrement

-- This takes a single type of Model
-- and returns a single type of Html Msg
view : Model -> Html Msg
view model =
  div []
    [ button [ onClick Decrement ] [ text "-" ]
    , div [] [ text (toString model) ]
    , button [ onClick Increment ] [ text "+" ]
    ]
```

```
const helloWorldReducer = (state=0, action) => {
  switch(action.type){

    case PLUS:
      return Object.assign({}, state, state + 1)

    case MINUS:
      return Object.assign({}, state, state - 1)

    default:
      return state
  }
}
```
