REALKINETIC

YOUR POTENTIAL REALIZED

```elm
type Msg = Increment | Decrement

-- This takes a single type of Model
-- and returns a single type of Html Msg
view : Model -> Html Msg
view model =
  div []
    [ button [ onClick Decrement ] [ text "-" ]
    , div [] [ text (toString model) ]
    , button [ onClick Increment ] [ text "+" ]
    ]
```

```elm
-- Html is another type alias for:
type alias Html msg = VirtualDom.Node msg
-- This type as a "generic" type.

-- The msg could be anything:
type alias Html a = VirtualDom.Node a
```

```java
// Java Generics:
public interface Html<A> {}
Html<Msg> myHtml = new MyHtml(myMSG)
```
