

real_kinetic.com/real_kinetic

REALKINETIC

YOUR POTENTIAL REALIZED

```
f, err := os.Open("filename.ext")  
if err != nil {  
    log.Fatal(err)  
}
```

Thankfully there are
functions in the maybe
package to help us out

```
f, err := os.Open("filename.ext")  
if err != nil {  
    log.Fatal(err)  
}
```
