REALKINETIC

YOUR POTENTIAL REALIZED

```
maximumInt : List Int -> Int
maximumInt list =
  case list of

    [] ->
      0

    [x] ->
      x

    x :: xs ->
      foldl max x xs
```

But this kinda sucks. If
we give an empty list
we get back a 0.

```
maximumInt : List Int -> Int
maximumInt list =
  case list of

    [] ->
      0

    [x] ->
      x

    x :: xs ->
      foldl max x xs
```
