REALKINETIC

YOUR POTENTIAL REALIZED

-- You can alias a type

```
type alias Things = Int
```

-- This allows us to make more readable types.

```
thing : Things  
thing = 0
```

-- This is a sum or union type
 (specifically a boolean type in this case).
-- You may also see: tagged or disjoint
-- unions or variant types
type Msg = Increment | Decrement

```
-- You can alias a type
